| QUESTION |                                                   | ANSWER |                             |
|----------|---------------------------------------------------|--------|-----------------------------|
| 1        | What is the function of the heart?                | 1      | to pump blood               |
| 2        | What is the function of the lungs?                | 2      | to exchange gases           |
| 3        | What is the function of the stomach?              | 3      | to digest food              |
| 4        | What is the function of the liver?                | 4      | to produce bile             |
| 5        | What is the function of the pancreas?             | 5      | to produce insulin          |
| 6        | What is the function of the kidneys?              | 6      | to filter blood             |
| 7        | What is the function of the bladder?              | 7      | to store urine              |
| 8        | What is the function of the intestines?           | 8      | to absorb nutrients         |
| 9        | What is the function of the skin?                 | 9      | to protect the body         |
| 10       | What is the function of the muscles?              | 10     | to move the body            |
| 11       | What is the function of the bones?                | 11     | to support the body         |
| 12       | What is the function of the brain?                | 12     | to control the body         |
| 13       | What is the function of the nerves?               | 13     | to transmit signals         |
| 14       | What is the function of the eyes?                 | 14     | to see                      |
| 15       | What is the function of the ears?                 | 15     | to hear                     |
| 16       | What is the function of the nose?                 | 16     | to smell                    |
| 17       | What is the function of the mouth?                | 17     | to eat and speak            |
| 18       | What is the function of the throat?               | 18     | to swallow                  |
| 19       | What is the function of the trachea?              | 19     | to breathe                  |
| 20       | What is the function of the bronchi?              | 20     | to breathe                  |
| 21       | What is the function of the alveoli?              | 21     | to exchange gases           |
| 22       | What is the function of the diaphragm?            | 22     | to breathe                  |
| 23       | What is the function of the rib cage?             | 23     | to protect the lungs        |
| 24       | What is the function of the heart valves?         | 24     | to prevent backflow         |
| 25       | What is the function of the blood vessels?        | 25     | to transport blood          |
| 26       | What is the function of the capillaries?          | 26     | to exchange substances      |
| 27       | What is the function of the arteries?             | 27     | to carry oxygenated blood   |
| 28       | What is the function of the veins?                | 28     | to carry deoxygenated blood |
| 29       | What is the function of the lymphatic system?     | 29     | to transport lymph          |
| 30       | What is the function of the immune system?        | 30     | to fight infection          |
| 31       | What is the function of the endocrine system?     | 31     | to produce hormones         |
| 32       | What is the function of the reproductive system?  | 32     | to produce offspring        |
| 33       | What is the function of the digestive system?     | 33     | to break down food          |
| 34       | What is the function of the circulatory system?   | 34     | to transport blood          |
| 35       | What is the function of the respiratory system?   | 35     | to breathe                  |
| 36       | What is the function of the excretory system?     | 36     | to remove waste             |
| 37       | What is the function of the integumentary system? | 37     | to protect the body         |
| 38       | What is the function of the muscular system?      | 38     | to move the body            |
| 39       | What is the function of the skeletal system?      | 39     | to support the body         |
| 40       | What is the function of the nervous system?       | 40     | to control the body         |
| 41       | What is the function of the sensory system?       | 41     | to receive information      |
| 42       | What is the function of the motor system?         | 42     | to respond to information   |
| 43       | What is the function of the homeostatic system?   | 43     | to maintain balance         |
| 44       | What is the function of the reproductive system?  | 44     | to produce offspring        |
| 45       | What is the function of the digestive system?     | 45     | to break down food          |
| 46       | What is the function of the circulatory system?   | 46     | to transport blood          |
| 47       | What is the function of the respiratory system?   | 47     | to breathe                  |
| 48       | What is the function of the excretory system?     | 48     | to remove waste             |
| 49       | What is the function of the integumentary system? | 49     | to protect the body         |
| 50       | What is the function of the muscular system?      | 50     | to move the body            |
| 51       | What is the function of the skeletal system?      | 51     | to support the body         |
| 52       | What is the function of the nervous system?       | 52     | to control the body         |
| 53       | What is the function of the sensory system?       | 53     | to receive information      |
| 54       | What is the function of the motor system?         | 54     | to respond to information   |
| 55       | What is the function of the homeostatic system?   | 55     | to maintain balance         |
| 56       | What is the function of the reproductive system?  | 56     | to produce offspring        |
| 57       | What is the function of the digestive system?     | 57     | to break down food          |
| 58       | What is the function of the circulatory system?   | 58     | to transport blood          |
| 59       | What is the function of the respiratory system?   | 59     | to breathe                  |
| 60       | What is the function of the excretory system?     | 60     | to remove waste             |
| 61       | What is the function of the integumentary system? | 61     | to protect the body         |
| 62       | What is the function of the muscular system?      | 62     | to move the body            |
| 63       | What is the function of the skeletal system?      | 63     | to support the body         |
| 64       | What is the function of                           |        |                             |

The top diagram illustrates the upper digestive tract, showing the esophagus leading into the stomach, which then connects to the small intestine. The bottom diagram shows the lower digestive tract, including the large intestine and the rectum.

This diagram depicts the human muscular system, highlighting the major muscle groups and their attachment points to the skeleton.

| Geometrische Konstruktion (Geometrie - Konstruktion) |              |              |              |
|------------------------------------------------------|--------------|--------------|--------------|
| Nr.                                                  |              |              |              |
